

Senses

Different ways animals or humans can take in clues to help make sense of the world.

Seeing

A sense used by the **eyes** to understand **visual** clues.

Hearing

A sense used by the **ears** to understand **auditory** clues.

Vibration

A fast back-and-forth motion of an object.

Reflection

An image made by heat, light, or an image bouncing off a surface.

Touch

A sense used by the **hands** to understand **feeling** clues.
